

## SAFARI FUN

As the dawn is breaking the journey begins with the Game Ranger leading the way.  
Out on the plains the impala stare while warthogs strut about, tails up high.  
From the call of the African Hoopoe to the thunder of the elephant herd the audience will be captivated by the diversity of wildlife in Africa. A highlight of the show will be our beautiful Rhino's, and the severe situation in our country where they are being poached on a daily basis.

Children will be encouraged to do everything they possibly can to Save our Rhinos. The underlying theme of this production is to teach the importance of conservation and how each one of us has a part to play in saving our environment. At the same time children will be learning many interesting facts about our wildlife and there various habitats.
