

THE WONDERS OF WATER

Clean, bountiful water is one of the most important resources around the world. All life on Earth needs water in order to survive and because water is life, we must respect it and must use it wisely.

This interactive show will cover the following:

- The uses of Water
- The Water Cycle
- What is a Drought?
- Climate Change
- How water shortages affect our wildlife
- What to do when you can't get water from your home
- Health and Sanitation
- How to be water wise at home

No matter where you are in the world, you can do your part to conserve water by both saving water from being wasted and protecting water from becoming polluted. The audience will be encouraged to go home and educate their families to be "Water Wise". We will not be getting second chances.
